The application has been amended as follows:

In the claims:

Claim 4, line 1, "claim 1" has been changed to -- claim 3 --.

Claim 13, line 1, "claim 10" has been changed to -- claim 9 --.

2. The following is an examiner's statement of reasons for allowance:

The subject matter of the claims is allowable over the prior art of record because all prior arts fail to teach or suggest a method or system for marking data packets of a data transmission flow pertaining to an end-to-end connection to which an end-to-end transport protocol is associated within a packet network, by generating a priority based on at least one service quality parameter for each subsequent one of said data packets, attributed to said data transmission flow and based upon a network feedback parameter indicative of the state of congestion with the packet network, and inserting the priority within each subsequent one of the data packets for further transmission to the packet data network, wherein the network feedback parameter is extracted from a standard feedback packet of the end-to-end protocol.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
